Installation. Though most LED lighting fixtures are considered low-voltage, that means they either have a transformer build in or require an external transformer, the good news is, it is not necessary to rewire a house to use LED's. All the wiring that is commonly used in houses is perfectly fine for use with LEDs.

A Practical Guide to LED Lighting in Residential ...

While residential service entrance installations using a raceway of some type are very common, branch-circuit installation using a raceway wiring method is seldom used. There is no question that cable wiring methods are easier to install than raceway wiring methods, and this is the main reason why most houses are wired using as little raceway as possible.
