The ingredients have been easy to find—lots of vinegar and baking soda and fruit—and the clean up has been a breeze. Best of all, the kids and I have learned about the properties of atoms and molecules! There are five volumes in the series, each named Adventures with Atoms and Molecules followed by a volume number. We are using volumes I and II, completing simple home-made experiment pages, reading science-y books, and having fun!

Dispersion forces that develop between atoms in different molecules can attract the two molecules to each other. The forces are relatively weak, however, and become significant only when the molecules are very close. Larger and heavier atoms and molecules exhibit stronger dispersion forces than do smaller and lighter atoms and molecules.
