freshwater is stored in glaciers. Therefore, glacier ice is the second

How much of the Earth's water is stored in glaciers?

Water covers 70% of our planet, and it is easy to think that it will always be plentiful.

However, freshwater—the stuff we drink, bathe in, irrigate our farm fields with—is incredibly rare.

Where To Download

Only 3% of the world's water is fresh water, and two-thirds of that is tucked away in frozen glaciers or otherwise unavailable for our use. As a result, some 1.1 billion people worldwide lack access
