This next level of blockchain tech is speculated to be a combination of AI and distributed ledgers. However, things may take a different turn if blockchain 3.0 solves scalability, interoperability, sustainability and privacy issues unlike previous generation blockchain 1.0 and 2.0 projects that have struggled to overcome the existing barriers.

Blockchain 3.0: Beyond Bitcoin and First-Generation ...

2.1 Overview and Architecture of Blockchain Essentially, blockchain is a peer-to-peer network that sits on top of the internet [13], which was introduced in 2008 as part of a proposal for Bitcoin [19]. The blockchain is a public ledger made up of a sequence of blocks, which holds a full history of transaction records that occurred within the ...
