The Cessna 310 is a complicated airplane. The tall landing gear might be thought of as delicate and its systems demanding, both to maintain and operate. But the 310 still offers substantial transportation value, and the many different variants that were built as the model evolved means it shouldn't be hard to find the right one for your mission.üü

The 310 was Cessnas first modern business twin, reflecting the companys strong growth in the 1950s. It was a time when many of the now-familiar Cessnas were first introduced: the earlier 140s and 170s were giving way to 172s and 182s. Cessna was moving aggressively into the business market, and the 310 was a key part, and first element, of that ...
