Cloud Computing And Electronic Discovery

Cloud Computing and Electronic Discovery offers an accessible resource that explores cloud computing technology's impact on electronic discovery approaches in litigation and criminal investigations. The key issue from a legal perspective is that an investigator or litigant cannot simply access the data that is held by a third party in the cloud.

Amazon.com: Cloud Computing and Electronic Discovery ...

The rise of cloud computing and storage has been a growing trend in both enterprise business and in e-discovery. Simply put, cloud computing is a method of using remote servers on the internet (as opposed to on-premise servers) to process, manage, and store data. According to some sources, up to 60% of business data is stored in the cloud and this number is anticipated to grow to 65% for potential organizational ESI in the coming years.

The Future of E-Discovery and the Cloud - Special Counsel

Cloud-based e-discovery: Using a hosting provider to run e-discovery processes on data archived to the cloud. This comes in two forms. First, a customer can archive data at a hosting provider with...

Cloud Computing and Electronic Discovery by James P ...

When setting up cloud computing, practitioners need to determine if the chosen cloud vendor has the tools to search, collect, and lock down the data. They must also consider discovery deadlines and the amount of time it will take to for the vendor to download large volumes of information into a usable format that is appropriate for an e-discovery review.

Data Trends: Cloud Computing and E-Discovery

E-discovery in the cloud, whether IaaS or as part of a hosted service, addresses many of these IT challenges. Cloud-based workflow management platforms today can help automate and orchestrate e-discovery, and support more robust, less error-prone e-discovery compliance.

eDiscovery in the Cloud: Challenges and Benefits

E-Discovery Issues In Cloud Computing Regardless of data-management method, an organization's e-discovery obligations remain unchanged. Because cloud computing involves accessing information from third-party providers in off-site locations, satisfying these obligations in the cloud presents challenges on top of those that exist anyway.

The E-Discovery Implications Of The Cloud
