Chapter 6 : Competing Paradigms in Qualitative Research ...

Constructivist believe that there is a strong difference between qualitative research and qualitative research. Both type of research cannot be solved using one paradigm. Until the birth of the pragmatic paradigm it was believed that qualitative research cannot be combined with quantitative approach.

Quantitative and Qualitative Paradigms of Research ...

Qualitative research is descriptive in that the researcher is interested in process, meaning, and understanding gained through words or pictures. The process of qualitative research is inductive in that the researcher builds abstractions, concepts, hypotheses, and theories from details.Merriam, S. B. (1988).

Qualitative Research Paradigm | Educational Research ...

A variety of conceptions of qualitative research exist, with competing claims as to what counts as good quality work. Rather than opting for the criteria promoted by one variety, "paradigm," "moment," or school within qualitative research, practicing researchers can learn valuable lessons from each one. This is because social research is a craft skill, relatively autonomous from the need to resolve philosophical disputes.

The dominant research paradigms adopted in research studies are interpretivist, pragmatist, constructivist, positivist, and post-positivist paradigms.

(PDF) An introduction to research paradigms

The SAGE Handbook of Qualitative Research, Third Edition, represents the state of art for the theory and practice of qualitative inquiry. Built on the foundations of the landmark First and Second Editions (1994, 2000), the Third Edition moves qualitative research boldly into the 21st century. The editors and authors ask how the practices of qualitative inquiry can be used to address issues of ...

The SAGE Handbook of Qualitative Research - Denzin ...

Scientific research, the systematic quest for knowledge, can be considered through different research paradigms that make assumptions about how the world operates. 1 These research paradigms are the philosophies of science, 2 which guide the way science is conducted by shaping the following core elements: ontology (how reality is viewed), epistemology (how the nature of knowledge is conceived ...

The Positivism Paradigm of Research : Academic Medicine

Which research paradigm does my research belong to? In really simple terms, the three most common paradigms are explained below (and are shown in this epistemology diagram too, taken from here): Positivists believe that there is a single reality, which can be measured and known, and therefore they are more likely to use quantitative methods to ...

The research paradigm - methodology, epistemology and ...

A qualitative research design was used which included convenient sampling of nursing students who were enrolled in clinical courses. Four focus groups were conducted until saturation was reached. Focus groups were recorded, transcribed verbatim and data analysis followed a content analysis approach.

Guba, E. G. & Lincoln, Y. S. 1994. Competing paradigms in ...

The chapters move from competing paradigms (positivist, postpositivist, constructivist, critical theory) to specific interpretive perspectives, feminisms, racialized discourses, cultural studies, sexualities, and queer theory. It concludes with consideration for the future of qualitative research.

Competing Paradigms and Health Research17 In order to do this, we need to have a clear understanding of the epistemo- ... titative and qualitative paradigms of research are metaphysically incommensu-rable. By this we mean the extent to which they are logically inconsistent or mutually exclusive. For example, ontologically speaking, social ...

Competing Paradigms and Health Research

Patient engagement (or patient and public involvement) in health research is becoming a requirement for many health research funders, yet many researchers have little or no experience in engaging patients as partners as opposed to research subjects. Additionally, many patients have no experience providing input on the research design or acting as a decision-making partner on a research team.
