Delay Forensic Schedule Analysis

analysis is described as the research and analysis of an event, performed with the goal to identify the reason for a project delay. Common in the construction industry, delay analysis is used to identify delays and resolve claims or disputes. In order to successfully perform such analysis, knowledge of CPM and scheduling, combined with the knowledge of

Delay Forensic
Schedule Analysis

delay analysis is not important just in claims on completed projects, but just as important to resolve delays that have been absorbed into the schedule during the project. If you think of this as similar to costs, an Owner would rarely allow a Contractor to provide an estimate or a guess about a time & material change order.
