Security Enhancements (SE) for Android™ was a NSA-led project that created and released an open source reference implementation of how to enable and apply SELinux to Android, made the case for adopting SELinux into mainline Android, and worked with the Android Open Source Project (AOSP) to integrate the changes into mainline Android.

### SEforAndroid - SELinux Wiki

SE for Android's first security win was in helping admins prevent rooting of Android phones (typically by malware) — a long-time problem for IT managers trying to protect company data on mobile devices. With enforcing MACs in Android, a compromised process in one part of the smartphone is unable to affect other files and processes.
