...

Geospatial visualizations are one of the earliest forms of information visualizations. They were used historically for navigation and were essential tools before the modern technological era of humanity. Data maps were first popularized in the seventeenth century and have grown in complexity and detail since then.

(PDF) GIS, Maps and Visualisation - ResearchGate

These pages are a compilation of lecture notes for my Introduction to GIS and Spatial Analysis course (ES214). They are ordered in such a way to follow the course outline, but most pages can be read in any desirable order. The course (and this book) is split into two parts: data manipulation & visualization and exploratory spatial data analysis.
