The Hankison DKC Series Desiccant Dryer has a compact design, which makes it suitable for wall mounting and is very easy to operate. The upstream and downstream filters included in the package can also be equipped with optional filter monitors for differential pressure monitoring.

Desiccant dryers DKC series - Hankison: Home

HMW series desiccant dryers use electrical heaters inside of the desiccant bed for regeneration of the saturated desiccant. The direct contact of the finned heater tubes with the desiccant bed makes most efficient use of the regeneration energy. A small part of the compressed air flow of only 2.2% removes the moisture and cools down the desiccant.

Hankison: HMW

Aftermarket - Service kits >. Well, not completely new, but reNEWed. Since the build of our first adsorption dryers there is a high demand for service kits.

The HHL series are heatless regenerated desiccant dryers equipped with level 1 control as standard and operate in a 10 minute cycle with a pressure dew point of -40 °C. Hankison HHL Series desiccant dryers can be individually set to a specific pressure dew point. 4 minute cycle For a pressure dew point of -70° C, inlet temperature +35° C

Desiccant dryers HHL series - Hankison: Home

Desiccant Compressed Air Dryers. Desiccant compressed air dryers function by drawing water vapor into a porous high-water affinity medium. Often placed down-stream or used as a second stage dryer because desiccant compressed air dryers rely on a relatively unsaturated medium to operate effectively.

Air Treatment Solutions | SPX FLOW: Global Industrial ...

desiccant. As the desiccant bed gets saturated, the color of the desiccant change-out indicator changes from blue to white. At the bottom of the housing, the compressed air flows upwards through an integrated dust filter and into an outlet air stem which takes it to the outlet port of the dryer housing.
