OCRE's "Identify a Coin" tool is one of the most complete depictions of numismatic Imperial portraiture online, and the ANS hopes that it will also prove itself a useful art historical tool to trace the development of Roman portraiture from the Augustan period through the Soldier Emperors to the Tetrarchy until the end of the Roman Empire.

New Image-Based Roman Coin Identification

Roman coins were so widely accepted that border areas assumed that only coins that looked Roman could be valid. So when the barbaric areas needed additional coins they made their own. If you find a coin which appears Roman but has an impossible legend (all "I"s for instance), it may be a barbaric imitation. The style is also usually very crude.

Roman Coin Attribution Toolkit

Usually, the Roman coins carry on the reverse gods or goddesses. Some people collect a particular god. For example, the Mother of The Gods, Cybelle, or the goddess of love, Venus, or the god of war, Mars, or the goddess of wisdom, Minerva. If you collect these types, you must know how to identify these gods.
