Put simply, compound interest changes the amount of money in the bank each time and a new calculation has to be worked out. Examples Calculate the interest on borrowing £40 for 3 years if the ...

## **Simple and compound interest - Percentages - Edexcel ...**

Compound interest is the type of interest that is more normally paid out by banks to savers. With compound interest, the interest earned over time will continue to increase as long as no money is withdrawn from the account. This is because all previously earned interest remains in the account so the sum from which to calculate interest becomes ...
