and the second flip lands tails-up. Independent 4) You roll a fair six-sided die three times. The die shows an even number every time. Independent Find the probability. 5) A bag contains three red marbles and three blue marbles. You randomly pick a marble

Independent and Dependent Events - Kuta

Two events are said to be independent if the result of the second event is not affected by the result of the first event. The probability of one event does not change the probability of the other event. If A and B are independent events, the probability of both events occurring is the product of the probabilities of the individual events.
