### Live Sound Engineering

Live sound engineering requires solid knowledge of sound engineering equipment, such as microphones, amplifiers, monitors and audio lines. But that's only part of the job. Engineering live audio also requires strong people and communication skills. It takes a team to stage live concerts, and a live audio engineer is part of that team.

### How Live Sound Engineering Works | HowStuffWorks

A live sound engineer is someone who blends and balances multiple sounds at a live event by using a mixing console, pre-recorded material, voices and instruments. The sounds are equalized, routed and amplified through loudspeakers.
