Mazda 6 2.2 sport DPF light reset

socket wrench image by Jim Mills from Fotolia.com. The Mazda 6's engine light is designed to quickly alert the driver to failing drivetrain components. When the light comes on without reason, or refuses to turn off after the problem has been repaired, a manual reset is required. Since the light is controlled by the computer system, momentarily disconnecting the power supply will turn the light off, delete all stored error codes, and restore the system to a factory state.

How to Reset a Mazda 6 Engine Light | It Still Runs

How to reset DPF after cleaning process 1. Switch ignition to "ON" position. (engine off) 2. Connect the pin in the red circle (in the pic below) to earth (chassis). 3. Press the accelerator to the floor and release 2 times. NB The glow plug light flashes 2 times when resetting is complete. 4. Switch ignition to "OFF" position. 5.
