Midwest Malibu Center Annual Inspections Turbine ...

The Piper PA-46 Malibu and Matrix are a family of American light aircraft manufactured by Piper Aircraft of Vero Beach, Florida. The aircraft is powered by a single engine and has the capacity for one pilot and five passengers. Early Malibus were all piston-engined, but a turboprop version, introduced as the Malibu Meridian but now called the M500, is also available.

Piper PA-46 - Wikipedia

Maintenance Owners should be familiar with applicable Piper and Lycoming service documentation, Service Bulletins and Instructions that apply to the Mirage and TIO-540-AE2A. It is good maintenance practice with any engine at each oil and filter change to open the paper filter element and examine for any quantity of material.

OPERATING RECOMMENDATIONS

The "straight Malibu", not the Mirage (1984-1988 models), is my personal favorite of the piston version PA-46's. I currently fly a 1985 Malibu and have done so since early 2010. Most PA-46 owners will tell you that the airframe is the best airplane in the world, bar-none... "firewall backward".

Thinking of buying an 84-88 Malibu? | Casey Aviation, Inc.

* \$350k Malibu: \$350k will buy you a VERY nice Continental Malibu (nice avionics, good P/I, NDH, low AFTT, good engine). Can you buy one for cheaper? Sure. If you buy a cheaper one, plan to spend a little more on maintenance and then add/decrease some of the other costs.
