Protozoology

Protozoology, the study of protozoans. The science had its beginnings in the latter half of the 17th century when Antonie van Leeuwenhoek of the Netherlands first observed protozoans by means of his invention, the microscope.

Protozoology | Britannica

Protozoology is the study of protozoa, the "animal-like" (i.e., motile and heterotrophic) protists. This term has become dated as understanding of the evolutionary relationships of the eukaryotes has improved. For example, the Society of Protozoologists, founded in 1947, was renamed International Society of Protistologists in 2005.
