Amazon.com: Smart Green: How to Implement Sustainable ...

Smart Green presents the argument that to be "sustainable" a business (community/industry/economy) has to consider a "triple bottom line": its effect on the physical environment AS WELL AS its effect on the human community around it AS WELL AS its fiscal responsibilities as a business. We've suffered for too long from a business model that only ...

Smart Green companies must first reflect on what it takes to be green and be aware of sustainability issues. They should become green-aware; bio-aware; socially-aware; energy-aware and regionally-aware. Smart Green companies conduct a needs analysis through footprint analysis, product life cycle analysis, business relationship analysis, and cash flow analysis. The outcomes help in the preparing of a green mission statement, which includes goals and objectives, desired outcomes, and involving ...

8 Steps to Successfully Implement Your Marketing Plan Blue ...

First take off the propeller then check the circuit. You have 3 legs on the turbine. Solder to each one piece of copper wire. Put back the propeller then turn your multimeter on AC mode and check wich of these three legs have the higher voltage, In may case that was the green and the white wires. Simply desolder the third wire.
