Term rewriting is a simplification process that starts with one or more rewrite rules and an initial term. This initial term

Access PDF Term Rewriting And Applications 18th International

Conference, Rta 2007, Paris, France, June 25-29, 2007. Proceedings Lecture Notes in Computer Science

is gradually reduced to a term that cannot be further simplified: this is the outcome of the rewriting process and is called the normal form.. In each step, a redex is searched for in (the possibly already simplified) initial term and it is replaced by the rewrite rule ...

Term rewriting systems are an interesting model of computation. They may be used to represent abstract interpreters of programming languages and to model formula manipulating systems used in various applications, such as program optimization, program validation, and automatic theorem proving.

Rewriting - Wikipedia

Context-sensitive rewriting (CSR) is a restriction of rewriting which forbids reductions on selected arguments of functions. Proving termination of CSR is an interesting problem with several applications in the fields of term rewriting and programming languages. Several methods have been developed

Access PDF Term Rewriting And Applications 18th International Conference Rta 2007 Paris France June 26 28 2007

for proving termination of CSR.

Proving Termination of Context-Sensitive Rewriting with MU ...
