The government also helps stabilize the economy through fiscal and monetary policy. Government as a Regulator As a regulator, the government legislature and judicial branch work to protect consumers (the UCC), investors (SOX), workers (labor laws) and the environment. It also supports the legal framework that supports competition.

The Role of Government and Regulation - BrainMass

Whereas formal standards are the result of a market and industry driven approach, regulations are generated by a top-down approach and eventually enacted by the government. Consequently, in uncertain markets regulators are confronted with a higher level of information asymmetry than market actors engaged in formal standard setting activities being closer both to technologies provided by the supply side and changes on the demand side. 12
